

Shapes and Colour Trail

Hello, I'm Stan the Stethoscope. Today we are going on a trail to meet some of my friends.

The objects you can see in the gallery are made from many different shapes.

Read the names of the shapes below. Help me match the names of the shapes with the pictures.

Q1. What shape am I?

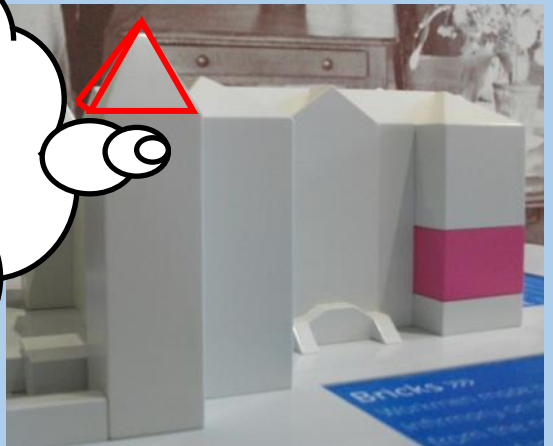

Q3. How many more shapes like this one can you see on this model?

Q2. What do you think I'm used for?

Q4. What Shape am I?

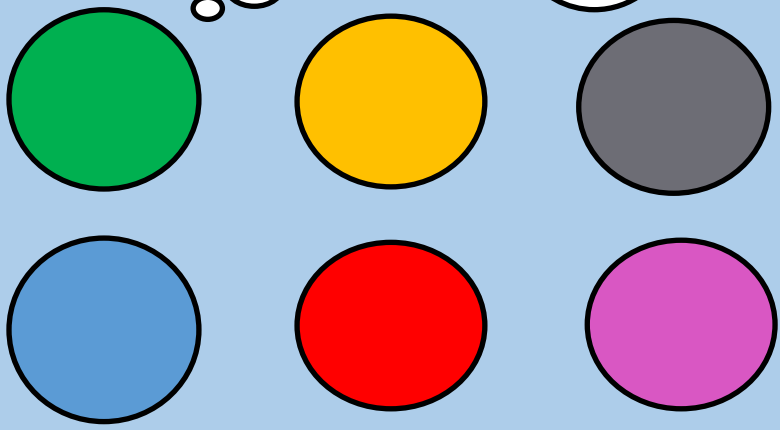

Q5. What two shapes are these?

Draw your favourite object from the gallery. Is it the same shape as the other objects?

What colours have you seen on our trail? Tick them as you find them.

Q6. What shape am I?

Q7. Have you seen any more colours? What were they?

Thank you for helping me. See you again soon.
